EXCENTIS

Established in May 2000, Excentis offers **testing services, specialized training and products for the telecom and ICT industry.**

TESTING

Excentis is worldwide the no. 1 independent test lab for DOCSIS® & PacketCable™ technology, best known for its thoroughness in certification testing on products for the European cable market.
Excentis strongly believes in its company values of integrity and vendor independence. Its well-equipped lab and proven expertise in data, telephony and video services over HFC networks and home network technologies as Wi-Fi, make Excentis the European competence center. Cable operators, service providers and product manufacturers of over the world rely on Excentis for unbiased, technical support.

TRAINING

Based on its practical experience, Excentis offers introductory and advanced training programs in the areas of cable networks, DOCSIS, PacketCable, Wi-Fi, IPv6 and many more.

PRODUCTS

Excentis also develops test and monitoring products. *ByteBlower*® is the cost-efficient traffic generator/analyser of Excentis. It is a flexible and scalable solution to use in operational networks or in a lab environment to assess performance and stability of networks and network equipment. Its ease of use and premium support makes it the n°1 choice. *VoIPexaminer*® is a software solution that monitors the quality of the Voice over IP (VoIP) telephony service in cable networks.
