5. Fees for feature based submissions of ED3.0 CMTSs

Feature set	Normal fee	Fee when discount is applicable
Base feature set	105.000	63.000
UCB (Upstream Channel Bonding) feature set	11.000	6.600
DBC (Dynamic Bonding Change) feature set	9.000	5.400
IPv6 feature set	9.000	5.400
Multicast feature set	9.000	5.400
Security feature set	9.000	5.400
S-CDMA feature set	9.000	5.400
OSS feature set	9.000	5.400
LI (lawful intercept) feature set	9.000	5.400

When a product has already passed for the Base feature set (and maybe one or more additional feature sets) in the four preceding certwaves, then a discount of 40% will be applicable on the feature set(s) that were already successfully verified, in case the same product is submitted again for these (and maybe more) feature sets.

An example:

- Wave A: product is submitted for Base feature set (105.000) + IPv6 (9.000) + DBC (9.000): total fee is 123.000 Euro. Result: product gets "Verified for the Base + IPv6 feature set", assuming the DBC feature set failed.
- Wave B (max 4 certwaves later than A): product is submitted for Base feature set (this feature set is always required,) fee: 63.000 + IPv6 (5.400) + DBC (9.000) + UCB (11.000) + Multicast (9.000): total fee is 97.400 Euro.
